

Your Virtual Operations Manager

Digitize. Monitor. Control. Grow.

One connected platform to manage people, operations, assets, finance, payroll, compliance and field execution — with the visibility management needs to stay in control.

PEOPLE

Workforce & Attendance

OPERATIONS

Field & SOPs

MONEY

Payroll & Accounting

ASSETS

Inventory & Tracking

THE DIFFERENCE

See everything. Control everything.

3rd Eye is not just an HR system, attendance app or security/FMS tool. It is a Virtual Operations Manager — a connected operating layer for the critical parts of a business.

ONE VIEW

See what is happening across sites, teams and processes.

ONE FLOW

Move from field event → validation → escalation → decision.

ONE CONTROL SYSTEM

Standardize the way work is performed, reviewed and reported.

ONE MANAGEMENT LAYER

Give leadership the information needed to act without chasing updates.

THE 3RD EYE PROMISE

Turn scattered operational activity into one visible, measurable and controllable system.

Less chasing. Fewer gaps. Faster decisions. Stronger execution.

THE PLATFORM

Every operational layer. Connected.

People & Workforce

Employee records, attendance, shifts and workforce visibility.

Payroll & Compliance

Payroll workflows, statutory processes and compliance outputs.

Accounting & Finance

Finance operations, expenses, payments, client billing and visibility.

Assets & Inventory

Asset registers, inventory, handover and operational accountability.

Field Operations

Field officers, site activity, incidents and operational follow-up.

Patrolling

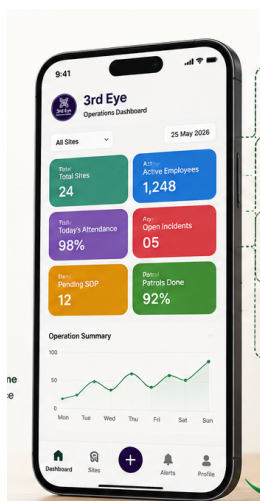

Round management, patrol visibility, exceptions and proof of execution.

SOP Tracker

Checklists, recurring work, reviews, exceptions and improvement.

Management & Reports

Dashboards, reports, alerts and executive insights.

MANAGEMENT AT A GLANCE

Attendance	Know who is where.
Patrolling	Know what was done.
SOPs	Know what was followed.
Payroll	Know what is due.
Reports	Know what needs attention.

HOW IT WORKS

One flow from field event to management

The platform is designed around operational control — not just data storage.

01**CAPTURE**

Attendance, patrols, incidents, checklist results, transactions and field events.

02**VALIDATE**

Apply rules, approvals, checks and exception handling.

03**ESCALATE**

Surface what needs attention instead of forcing managers to search.

04**PROCESS**

Run payroll, billing, finance, asset, SOP and operational workflows.

05**DECIDE**

Turn operational data into management action through dashboards and reports.

THE RESULT

Managers spend less time collecting updates and more time managing exceptions, performance, people, costs and growth.

REAL-WORLD USE

Built for real operations.

Security & Facility Operations

Attendance, patrolling, SOPs, field officers, incidents, assets, client billing and site visibility.

Manpower & Workforce Businesses

People, attendance, payroll, compliance, client deployment, reporting and workforce control.

Multi-Site Businesses

Centralized visibility across locations with consistent processes and management reporting.

Operations-Led Companies

Track work, standardize execution, manage assets and connect field activity to decisions.

Growing Organizations

Start with the operational core and expand modules as the organization grows.

Management Teams

One operating picture instead of separate updates from HR, finance and field teams.

3rd Eye
Virtual Operations Manager

EVERYTHING IN PLACE.

One App. Every Operation. Zero Gaps.

3rd Eye completes your operations. You stay in control.

COMPLETE VISIBILITY
Across sites and teams.

ACCURATE OPERATIONS
Every task. Every time.

BETTER COMPLIANCE
Standard processes. Always followed.

SAVE TIME & COSTS
Automate. Track. Optimize.

IMPROVE PERFORMANCE
Data that drives results.

ATTENDANCE
Know who is where.

PATROLLING
Every round. Every time.

SOP CHECKLIST
Standardize. Track. Improve.

PAYROLL
Accurate. On time. Every time.

REPORTS
Real time insights. Better decisions.

MISSING VISIBILITY. HIGHER COSTS. POOR PERFORMANCE.

45 DAYS FREE TRIAL
Experience the power of complete control. No commitment. Just results.

MANAGEMENT OUTCOMES

Control the details without losing the big picture

Complete visibility

Across sites, people, tasks, assets and operational processes.

Accurate operations

Capture execution at the point of work and make exceptions visible.

Better compliance

Standardize processes, checklists, approvals and evidence.

Save time & costs

Reduce manual follow-up, duplicate entry and disconnected reporting.

Improve performance

Use operational data to identify gaps, compare performance and act.

Scale with control

Add sites, users, workflows and modules without rebuilding the operating model.

THE OPERATING PRINCIPLE

Make every important operation visible, measurable and controllable.

3rd Eye gives management a common language for people, money, assets, field execution and compliance.

PRICING

Choose the level of control your operation
